

EdgeMarc Intelligent Edge™ Portfolio

All EdgeMarc Intelligent Edge™ devices provide a VoIP aware firewall, protocol harmonization for interoperability of VoIP devices, active VoIP line testing, call quality monitoring, QoS management, and more. For a more complete list of standard features, please see the second side of this document.

- NAT / Port Forwarding
- DHCP Relay
- DHCP Server
- Test UA
- Dynamic DNS
- Network Test Tools (PCAP, syslog)
- Proxy ARP
- AAA
- Remote Firmware Updates
- Custom CLI Configuration
- Call Admission Control (CAC)
- MOS Scoring / Call Quality Monitoring
- IPsec VPN Tunnels

Centralized Management from the **EdgeView Service Control Center**

All EdgeMarc Intelligent Edge™ appliances are centrally managed with the EdgeView Service Control Center. EdgeView dramatically simplifies EdgeMarc provisioning and offers a holistic view of activities occurring at the edge of a provider's network.

EdgeView enables providers to monitor voice quality, discover SIP interoperability issues and to quickly remediate issues without having to send a technician on-site. The solution pays for itself by reducing trouble tickets, expediting trouble resolution and improving customer experiences..

It's no wonder many of the world's leading service providers use EdgeView and deploy an EdgeMarc element as part of EVERY one of their UCaaS and SIP Trunk deployments. The solution pays for itself.

Manage and Provision

Configuration Management, Security Updates

Troubleshoot and Remediate

Issue Recognition/Remediation, Root Cause ID

Monitor and Alert

Real-time Visibility, Event Based Triggers

Report and Analyze

Service Quality Analytics, Analysis
