

Neptune 1050

High Availability Access Router for the Access Edge

Neptune 1050 is a fully redundant, modular, access router, with support for multiple access technologies it is purpose-built for operators wanting a converged edge platform for new and legacy services.

Neptune 1050 provides 300Gbps packet switching and a port fan-out of 380G with and 100G interfaces in a 1RU form factor. It provides an extensive set of interfaces for multiple access technologies such as Ethernet, MPLS, PON and legacy TDM(CES), making it the ideal solution for deployment at the access edge. With a full set IP/MPLS, transport capabilities, the Neptune 1050 can efficiently aggregate and route the services over the network, meeting their service performance needs (SLAs) on a service by service basis. Full redundancy and support for segment routing and MPLS-TP make the Neptune 1050 a perfect fit for operators delivering business and mission-critical services.

Neptune 1050 supports a full set of optical interfaces including 100G ZR/ZR+ coherent optical pluggables, this allows it to support both single layer, hop-by-hop IPoDWDM and multilayer IP and Optical transport. The operator can choose which approach best meets their needs, or they can run both in a hybrid approach.

With such a rich and robust feature-set, Neptune 1050 is well suited for a wide variety of applications and networking scenarios, these include;

- Mobile Backhaul
- TDM migration: supporting voice trunk and legacy service migration with circuit emulation services (CES) mapping a full range of legacy TDM interface speeds onto the packet switched network (PSN)
- Access Edge for Business services: a full range of Ethernet interfaces and full set of IP protocols ensure services are transported to meet the SLA's on a per service basis
- PON infill: with a 10GSFP+ OLT Optics pluggable module providing XGS-PON/EPON connectivity supporting up to 128 ONUs per OLT
- Converged Multi-access Edge: Supporting 5G, broadband backhaul, business services, PON and TDM migration all from a single converged access edge platform

Neptune 1050 Key Product Highlights

- Multi-access Edge supporting Ethernet, XGS-PON, EPON, TDM with CES
- 1RU small form factor with a 243mm depth
- 100G ZR/ZR+ optics support
- Precise frequency and phase/time synchronization using the latest industry standards
- Rich quality-of-service capabilities for different SLAs
- Security-Trust Anchor module infrastructure, secure boot, image signing, run-time defense
- Open NE for 3rd Party Management
- Advanced Management Capabilities provided by Muse Software

About Ribbon

Ribbon Communications (Nasdaq: RBBN) delivers communications software, IP and optical networking solutions to service providers, enterprises and critical infrastructure sectors globally. We engage deeply with our customers, helping them modernize their networks for improved competitive positioning and business outcomes in today’s smart, always-on and data-hungry world. Our innovative, end-to-end solutions portfolio delivers unparalleled scale, performance, and agility, including core to edge software-centric solutions, cloud-native offers, leading-edge security and analytics tools, along with IP and optical networking solutions for 5G.
