

Neptune NPT-1011

Compact Cell Site Router and IP/MPLS L3 CPE

NPT-1011, is optimized for customer premise and service provider demarcation points, and for business and mobile backhauling services. Measuring just 1RU in height, NPT-1011 offers up to 6 Gbps in capacity, enabling smooth transition from TDM to packet by supporting both packet (Ethernet, IP/MPLS and L3) and TDM services, via CES. The Neptune product line streamlines end-to-end metro service delivery by combining carrier-grade service assurance, visibility, and control with packet efficiency and multiservice support. Neptune offers a powerful, flexible, and efficient E2E metro solution for high-performance services through convergence of Ethernet (MEF CE2.0 certified), MPLS-TP, IP/MPLS, OTN, WDM, and TDM. Neptune also supports NFV services and SDN applications, which are compulsory in today's challenging metro environment.

With a rich and robust feature set, NPT-1011 is well-suited for a wide variety of applications and networking scenarios. These include mobile backhaul, wholesale services, residential multiplay, and business VPN connectivity services. Like all of Ribbon's transport products, NPT-1011 is managed by the Muse™ software suite.
