MEF CARRIER ETHERNET CERTIFIED PROFESSIONAL (CECP) Course

Course Duration: 5 days

What is MEF CECP?
The MEF Carrier Ethernet Certification Program is a vendor neutral, technical certification recognizing Carrier Ethernet (CE) expertise in professionals from a cross section of job functions

MEF-CECP and the MEF Professional Certification Framework
MEF-CECP is a professional level, specialization certification within the MEF Professional Certification Framework. Earning these certifications within the MEF Professional Certification Framework: MEF-NF, MEF-CECP and MEF-SDN/NFV, earns industry professionals the coveted MEF NETWORK EXPERT status

Preferred Candidates and Companies
This course is recommended for network professionals such as:

- Sales Engineering
- Product Management
- Product Development
- Network Engineering
- Network Architecture
- Product Support
- Network Operations
- Technically oriented Sales and Marketing Professionals

Companies to benefit by training and certifying their employees as MEF-CECPs include:

- Communications Service Providers (CSPs) of all tiers
- Technology solution providers for network services
- Large enterprise consumers of Ethernet business services
- System Integrators and Consultants supporting CSPs

MEF-CECP CERTIFICATION Benefits:

Considering the state of the CE services market, the benefits of MEF-CECP certification to you as an individual include:

- **Global recognition of your vendor-neutral CE skills, and an upward trajectory of your career path** as industry stakeholders develop, deliver and consume new generations of dynamic services across automated networks
- **An up-front alignment of your competencies with MEF 3.0**, as this global services framework gains momentum supported by major operators and technology providers alike
- **A direct connection to the global MEF Community** having 200+ member companies and 6000+ certified professionals in 85 countries

The benefits for companies that have a MEF-CECP employee pool are equally substantial:

- **CSPs**: Acquiring the CE understanding needed to develop, sell and deliver dynamic, orchestrated services to business customers and to conduct wholesale, inter-carrier transactions.
- **Enterprises**: Becoming a technically informed buyer of services, leveraging available service features, to drive network efficiencies and lower costs
- **Technology suppliers, consultants and integrators**: Positioning your company to win CE-related business with certified skills and improving your expertise
- **All**: The ability to recruit and retain the best and the brightest by offering the valuable, globally recognized MEF training and certifications

Why study with ECI rather than going at it alone?
- Instructor–led training through an MEF Accredited Training Provider (MEF-ATP) is the preferred and utilized by more than 80% of successful MEF-CECP candidates. This option enables more thorough, yet focused, coverage of the study materials, and as such can be a time saving preparation alternative for busy professionals
- ECI training programs last five days. This significantly reduces your study time
- Learn from ECI's subject matter experts that have been audited and are regularly monitored by MEF
- ECI offers class training, or private onsite for corporate group training in almost any location worldwide
- Nothing beats an interactive, instructor-led learning experience!
