

NPT 03 Course

Course Duration: 4 days

Course Content:

- L2 and MPLS technology recap
- MPLS-TP advance tunneling- Low/High priorities, QoS, CAC
- Multi Segment Pseudo Wire service
- Pseudo Wire Redundancy
- Tunnel consistency tool
- Service consistency tool
- LAG, MC-LAG
- OAM
- CFM
- PTP – Precision Time Protocol
- Troubleshooting
- Intro to IP/MPLS

Goals:

Upon completion of this course, you will be able to:

- Configure advanced L2VPN and MPLS-TP tunnels
- Use consistency, CFM and OAM tools

Prerequisites:

- Successful completion of NPT 1 course
- Successful completion of NPT 2 course
- Proven skills using NMS and EMS
