

MAKE COMMUNICATIONS WORK... FOR YOU

The no risk way to get your employees better connected, using
Microsoft Teams Phone System 

If your organization is like most, you still have an office phone system in a closet somewhere with black phones on every employee's desk. The only thing missing are the employees that can answer them... that's because they are working from home, from the road or at another location.

Calls are ringing at empty desks or being forwarded to personal cell phones. Staying connected to customers and co-workers involves texts, e-mails, calls & instant messages across 4 or 5 different platforms. Ugh!

It doesn't have to be that way...

Use Microsoft Teams, the same tool you already use for web conferences, file sharing and IM, as your office phone system.

It's easy to get started, so easy that we'll provide a 60-day no obligation trial of Poly endpoints and Ribbon security services. All your organization needs is the appropriate Microsoft Teams licenses, in most case you can work with your existing telecom provider. In minutes, your employees can make and receive business phone calls from Teams desktop or mobile clients as well Poly desk phones. We can even help you integrate many popular phone systems to simplify the transition.

Two of the leaders in communications and two Gold Microsoft Partners, Ribbon Communications and Poly have teamed up to provide this no risk program to get you started.

poly

PROGRAM FUNDAMENTALS

Organizations **can try the solution** for up to 60 days (Requires credit approval).

After **60 days**, organizations must either buy the solution or return it in good condition.

Up to five Poly P15 or CCX 600 units (or any mix and match of the two) and **5 seats** of Ribbon Connect per organization.

Includes Trialing up to
5 POLY DEVICES

The leading provider of headset, business phone and video solutions for Microsoft Teams.

Ribbon is a leading provider of communications security solutions. Ribbon Connect is a monthly service that secures the connection between Teams and a telecom provider.

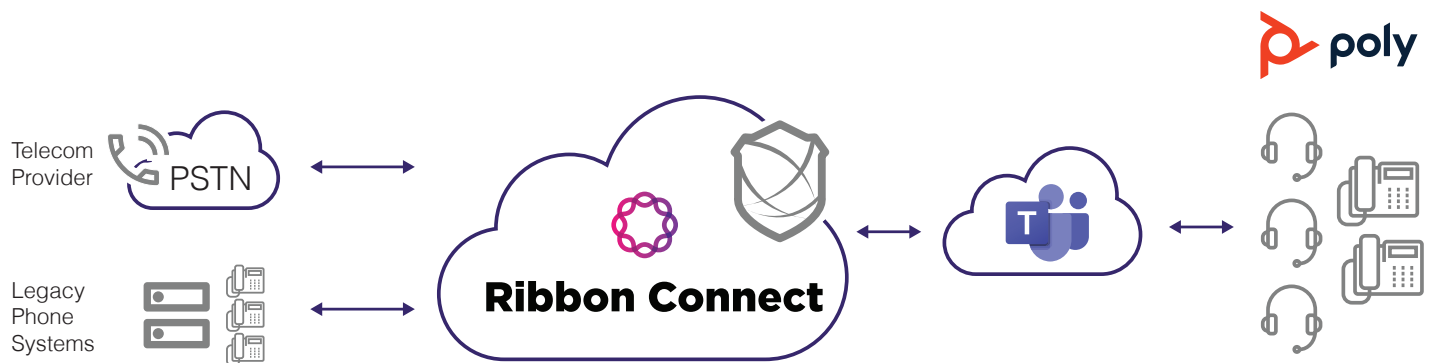

Poly endpoints improve engagement with customers and enhance productivity between employees.

Ribbon Connect also offers integration with existing PBXs to make Teams migrations simpler and faster.
