

# MAKE COMMUNICATIONS WORK... FOR FINANCIAL INSTITUTIONS

Improving the customer experience using the same technology that you use in the office.  
Introducing

## Microsoft Teams Phone System

Many banks and financial institutions already use a variety of Microsoft tools in the office. Did you know that Microsoft Teams also offers the ability to make phone calls, chat, and video conferencing? And that all these services can be accessed while out of the office? During the recent pandemic, social distancing requirements forced financial institutions to look for solutions to enable remote workers while maintaining client relationships.

With Microsoft Teams, Financial institutions can provide employees phone services that will allow customers to connect to account services when working at home, in the office, or on the go!

## Customer Satisfaction and Employee Safety, made simple...

Financial IT Staff can quickly provide phone services to employees by simply adding the appropriate Microsoft Teams License along with secure direct routing from Ribbon, and the appropriate device from Poly. In minutes, your employees can make and receive business phone calls from Teams desktop or mobile clients as well Poly desk phones. We can even help you integrate many popular phone systems to simplify the transition.

Ribbon, Poly, and Synnex are teaming up to make it even simpler. For a limited time, Synnex is offering a bundled Poly and Ribbon Teams enablement solution bundle and a 60-day no-obligation trial of Poly endpoints and Ribbon security services.

Two of the leaders in communications and two Gold Microsoft Partners, Ribbon Communications and Poly, have teamed up to provide this no-risk program to get you started.

### PROGRAM FUNDAMENTALS

Financial Institutions can try the solution for up to **60 days** (Requires credit approval).

After **60 days**, organizations must either buy the solution or return it in good condition.

Up to **five** Poly P15 or CCX 600 units (or any mix and match of the two) and **5 seats** of Ribbon Connect per organization.

Includes Trialing up to  
**5 POLY DEVICES**

The leading provider of headset, business phone and video solutions for Microsoft Teams.

Ribbon is a leading provider of communications security solutions. Ribbon Connect is a monthly service that secures the connection between Teams and a telecom provider.

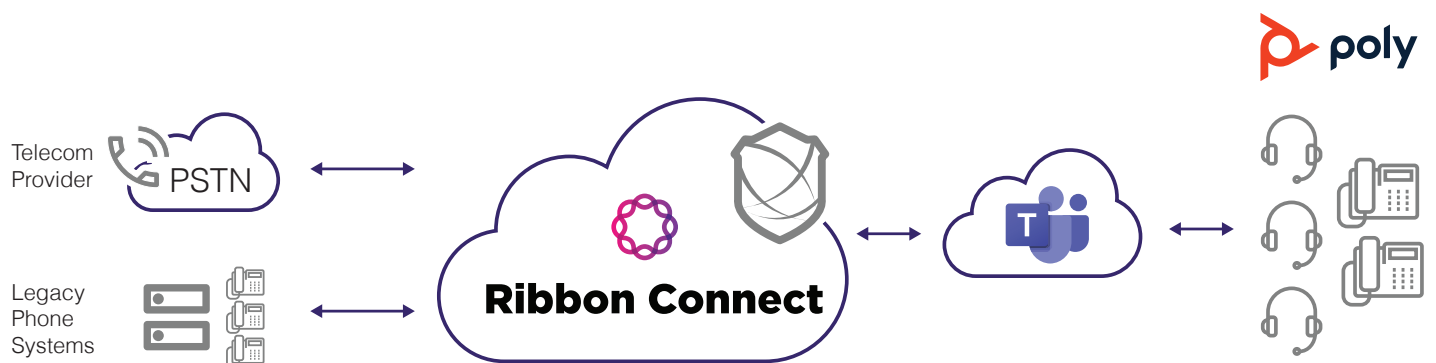

Poly endpoints improve engagement with customers and enhance productivity between employees.

Ribbon Connect also offers integration with existing PBXs to make Teams migrations simpler and faster.

## Simple to Deploy and Maintain

## Simple to Connect
