

MAKE COMMUNICATIONS WORK... FOR HEALTHCARE

Improving patient care using the same technology that you use in the office.
Introducing

Microsoft Teams Phone System

Many Healthcare organizations already use a variety of Microsoft tools in their offices and remotely. Did you know that Microsoft Teams also offers the ability to make phone calls, chat, and video conferencing? And that all these services can be accessed while out of the office? Patients can connect to doctors; doctors can connect to staff and diagnostic centers.

With Microsoft Teams, the healthcare community can be only a click, or two away and patient care can be faster, better, and closer than ever before.

Patient care, made simple...

Connecting the healthcare community to patients and each other can be as simple as adding the appropriate Microsoft Teams License along with secure direct routing from Ribbon and the appropriate device from Poly. In minutes, your employees can make and receive business phone calls from Teams desktop or mobile clients as well Poly desk phones. We can even help you integrate many popular phone systems to simplify the transition.

Ribbon, Poly, and Synnex are teaming up to make it even simpler. For a limited time, Synnex is offering a bundled Poly and Ribbon Teams enablement solution bundle and a 60-day no-obligation trial of Poly endpoints and Ribbon security services.

Two of the leaders in communications and two Gold Microsoft Partners, Ribbon Communications and Poly, have teamed up to provide this no-risk program to get you started.

PROGRAM FUNDAMENTALS

Healthcare organizations can try the solution for up to **60 days** (Requires credit approval).

After **60 days**, organizations must either buy the solution or return it in good condition.

Up to **five** Poly P15 or CCX 600 units (or any mix and match of the two) and **5 seats** of Ribbon Connect per organization.

Includes Trialing up to
5 POLY DEVICES

The leading provider of headset, business phone and video solutions for Microsoft Teams.

Ribbon is a leading provider of communications security solutions. Ribbon Connect is a monthly service that secures the connection between Teams and a telecom provider.

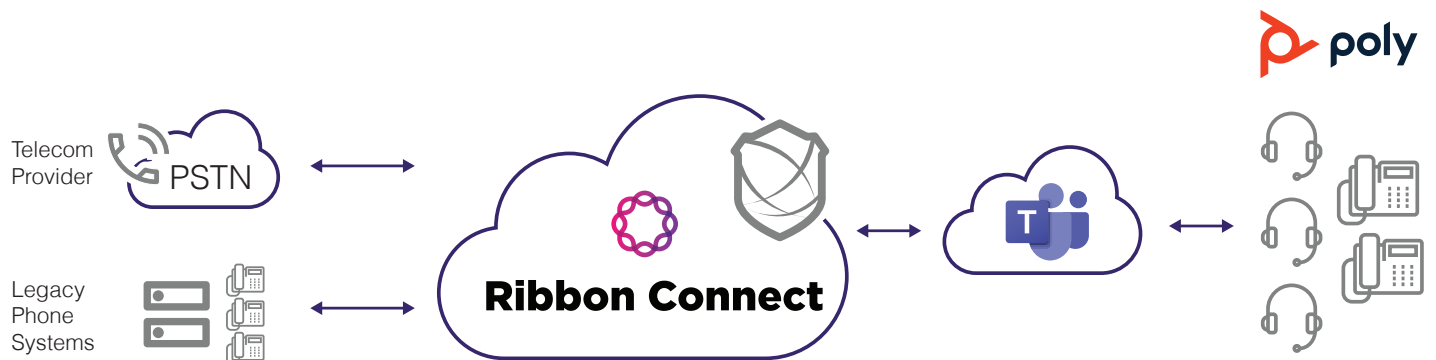

Poly endpoints improve engagement with customers and enhance productivity between employees.

Ribbon Connect also offers integration with existing PBXs to make Teams migrations simpler and faster.
